

EZMU002 - Kitty Cat

Terms

Setting the makeup: a process of keeping the makeup on longer and reducing smudging by sprinkling a small amount of setting powder onto a powder puff, folding the puff in half, and rubbing the powder into the puff, then lightly shaking off the excess powder from the puff and pressing the powder and puff into the makeup.

Base color: a makeup color that is used to represent the overall desired color of the character. You may wish to remove the makeup colors from the plastic palette for ease of use.

Stippling or patting makeup on: a process where cream makeup is applied using a sponge to apply the makeup with an up and down motion instead of a streaking motion.

Application Instructions

1. Begin with the makeup palette and the edge of a white makeup sponge. Apply the yellow makeup using short strokes towards the center of the face and neck. Set the makeup with colorless powder and a powder puff.
2. Using the clean side of a white makeup sponge or brush and apply the white makeup as shown, again using the edge of the sponge to create thin lines. Set with powder.
3. With the brush, apply black makeup to create the spots as shown. Then use the black makeup to outline and fill in the nose, lower lip and corners of the eyes. You may wish to highlight the nose and lip by adding a touch of white to the corners of each area.
4. Set the makeup with powder. Remove excess powder with a damp powder brush or damp tissue.
5. You can apply the glitter directly on the desired areas of the makeup before you have powdered the makeup. For better adhesion, mix the glitter into a very small amount of hair gel and apply to the skin.

You may want to use a temporary hair spray colorant to add to the completed look.

Removal

Use a small brush or cotton swab to rub a small amount of Cinema Secrets Makeup & Adhesive Remover onto the skin. Be careful when working around the eyes, to not get any remover in the eyes. Rinse the skin using a towel and warm water.
