

Includes:

2 Metal Attacks
Metal Attack Large
Deadly Screw
Blood Gel
Spirit Gum
Stipple Sponge
Undead Purple Make-
up
Bruised Red
Makeup

FX011 - Drive By

Step 1 - Always start your makeup with a clean, dry face. If you need moisturizer under the makeup, make sure it is water-based type, as it will be absorbed in the skin faster and will not leave an oily coating on the face. If applying makeup to several people we recommend scooping a small amount of makeup out and putting it on a palette, this will help prevent the spread of germs.

Step 2 - Apply Spirit Gum to the underside of each Woochie appliance, taking care to cover the edges completely so the edges don't peel up once adhered.

Step 3 - Once the adhesive is applied to the appliance, place the piece firmly onto the desired area. Remove the piece, lifting completely off the skin. Using your index finger, tack the adhesive using a rapid up and down motion. Continue until the spirit gum becomes matte or begins tugging the skin. The piece is now ready to re-apply. Press the piece firmly in place and check for any edges that may still be unattached. For those that are, work a small amount of Spirit Gum under the edge.

Step 4 - For a more completely hidden edge, apply a thin coating of Flesh Latex over the edge with a Makeup Sponge using a patting motion. A few thin coats will work better than one thick coat. A hair dryer on low heat may be used to speed dry the Flesh Latex.

Step 5 - Apply the bruised red makeup, using a Black Stipple Sponge, in a random pattern onto the piece and skin areas.

Step 6 - Apply undead purple makeup, using a Black Stipple Sponge, in the same random pattern to add depth to selected areas.

Step 7 - Upon completion of the makeup, you may blend the colors together with a Makeup Sponge or your finger tips. Powder using a Cinema Secrets Colorless Powder and a Powder Puff to set the makeup.

Step 8 - Apply Cinema Secrets Blood Gel as your final step for a truly ghastly effect. This type of blood has a thicker consistency designed to create a coagulated blood effect. It is best to apply it with a spatula or Black Stipple Sponge for a splattered effect.

A Black Stipple Sponge can be used to create a wide range of textures and effects. Use a rapid up and down stipple motion with black makeup on a Stipple Sponge for a five o'clock shadow. Also try adding black in a streaking motion across the surface of burns or bruises to create depth in a road rash; powder, then apply FX Blood to a portion of the stipple sponge and streak the sponge over the top of the black.

Removal - To remove all makeup, use soap and warm water, however it is best to use the Cinema Secrets Makeup & Adhesive Remover. Put a small amount into your hand and using the pads of your fingertips, massage into makeup. Work in circular motions, being careful not to get any in your eyes or mouth. If some should get in your eyes, flush them with plenty of cool water

Note: If you use your fingers to apply makeup, the oils in your fingers will work to break down the makeup. The makeup will not last as long or provide a smooth even coverage.

WARNINGS:

If you are sensitive to latex, discontinue use. Do NOT use around eye area. Do not ingest. Not intended as a food product. Not intended for children under 8 years of age.
