

FX015 - Mummy

Step 1 - Always start your makeup with a clean, dry face. If you need moisturizer under the makeup, make sure it is water-based type, as it will be absorbed in the skin faster and will not leave an oily coating on the face. If applying makeup to several people we recommend scooping a small amount of makeup out and putting it on a palette, this will help prevent the spread of germs.

Step 2 - Fit Mummy Appliance onto face to determine best fit. Trim excess latex away from eye area till comfortable (at least ¼ inch from corners of eyes).

Step 3 - On clean skin, brush or swab Cinema Secrets Spirit Gum onto the skin starting around the eye area. Tack the Spirit Gum using an up and down motion using your index finger or Makeup Sponge. This will increase the adhesion and wear time of the appliance. After adhering the eye areas, work your way around the forehead, nose and under eye areas, and lastly sides of the face and cheekbones.

Step 4 - Using the rough edge of a portion of a Makeup Sponge, dip the sponge into a small amount of Flesh Latex and apply a thin coat, overlapping the edge of the appliance and about ¼" onto the skin using a stippling or patting motion. Let dry. You may use a hair dryer set on low to help speed the drying process. Repeat the process for better coverage.

Step 5 - Using a portion of a Makeup Sponge with a stippling or patting motion, apply the green makeup base to the entire surface of the appliance. Overlap the edge of the appliance and blend onto the skin. Using the same sponge, with the undead purple makeup, apply the makeup to the hollows and contours of the face, eye sockets, under the cheek bones, temples, furrowed area of the brow, and corners of the nose. Lightly blend. Lastly apply the black makeup, using a cotton swab or small makeup detail brush, detail the cheekbones, bridge of the nose, sides of the forehead, and brow. Lightly blend.

Step 6 - Wrap head with Bandage Wrapping.

For added effect you may add veins, tattoos, moss or various makeup coloration or effects. To make the makeup last longer, set it with Colorless Powder and a Powder Puff. Remove excess powder with a damp powder brush or damp tissue.

Removal - To remove all makeup, use soap and warm water, however it is best to use the Cinema Secrets Makeup & Adhesive Remover. Put a small amount into your hand and using the pads of your fingertips, massage into makeup. Work in circular motions, being careful not to get any in your eyes or mouth. If some should get in your eyes, flush them with plenty of cool water

WARNINGS:

If you are sensitive to latex, discontinue use. Do NOT use around eye area. Do not ingest. Not intended as a food product. Not intended for children under 8 years of age.

Note: If you use your fingers to apply makeup, the oils in your fingers will work to break down the makeup. The makeup will not last as long or provide a smooth even coverage.
