

RM001 - Makeup & Adhesive Remover

Removing Spirit Gum

Remove any excess FX Blood or Blood Gel from the piece and skin with warm water and a paper towel. Using a small brush or cotton swab work a small amount of Cinema Secrets Makeup and Adhesive Remover under the edges of the prosthetic, being very careful around the eyes. Once the piece is off, use the adhesive remover to clean off any residual makeup and Spirit Gum. Finally, rinse the skin with warm water.

Removing Makeup

Using your fingers, a Cinema Secrets White Makeup Sponge or Powder Puff, work a small amount of Cinema Secrets Makeup & Adhesive Remover into the makeup, rubbing lightly in a circular motion. Once the makeup starts to come off, wipe with a tissue or paper towel. Repeat until clean.
